The Reasons for Allowance

Following the entry of the amendment filed 9/8/2003, the claims 5 and 13-24 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 5 and 13-24 no prior art has been found that teaches or suggests the kit for detecting the presence or absence of one or more target compounds comprising a plurality of electrophoretic probes comprising target binding moiety specific for a target compound in which each target binding moiety has one or more eTag reporters attached by cleavable linkages and a second reagent binding to said one or more target compounds. Each second reagent is being capable of generating an active species to cleave the cleavable linkage between the target-binding moiety and the eTag reporter. The active species is selected from the group consisting of singlet oxygen, hydrogen peroxide, NADH and hydrogen radicals.

The closest prior art is the reference of Van Ness et al. (6,027,890, issued February 22, 2000). Van Ness et al. disclose a variety of first and second member of a ligand pairs in which one or more members used in the method is tagged (See column 2, lines 14-27) and the tag is cleavable by oxidation (See column 4, lines 16-24). However, the ligand pairs do not have a second member which is capable of generating an active species to cleave the cleavable linkage between the target-binding moiety and the tagged portion and the active species being selected from the group consisting of singlet oxygen, hydrogen peroxide, NADH and hydrogen radicals.
